KETAI INDUSTRIES LIGHTING CO., LTD

JOIN US

WE LOVE TO WORK & WE LOVE WHERE WE WORK

WHO ARE WE

Founded in 1999, Ketai Industries Lighting Co., Ltd. has been focusing on development and production of professional lighting products with big portfolio of interior and exterior lighting fixtures, including traditional lighting, LED downlights, LED wall lights, LED track lights, LED pendant lights, LED Magnetic lights and LED garden lights which have been widely used into retail, residential and commercial lighting applications, acrossing 65 countries and regions.

With extensive R&D and manufacturing experience, Ketai has formed up a very efficiency supply chain ecosystem with big capacity and capability. Our factory covers an area of 40000 square meters, including the accredited test laboratory, die-casting workshop, stamping workshop, powder coating workshop, and 4+ assembly workshops.

To create and develop the everlasting low carbon green economy is the essential responsibility that KETAI is always pursuing with its high capability in quality, innovation, credit and service into its business management philosophy, to achieve greater development for enterprise and business partners.

- 24 years' experience in lighting industry;
- 500 employees;
- 40k sqm fully owned factory;
- 20 R&D engineers;
- 20 professional and well-experienced sales team to manage your inquiries and orders;
- The production status report every week as your request;
- 10 IQC & FQC / 4 QA team to assurance your products' quality;
- ISO 9001, ERP system, professional QC system, CE, ROHS, SAA certificates.
- Well-equipped laboratory,
- Top level of organization, production, customer service and marketing;
- Very well equipped production lines: 26 sets of punching machines, 2 painting lines, series of CNC machines and others;
- 30 million USD export turnout every year.

HISTORY OF DEVELOPMENT

Ketai Industries Lighting Manufacturer Professional in Commercial LED Lighting

MANUFACTURING PROCESS

Ketai Industries Lighting Manufacturer Professional in Commercial LED Lighting

LET INSPIRATION TALK

LED HEAT SINK

DIE-CASTING BENEFITS

- Complex shapes;
- Single manufacturing step;
- Durable & rigid;
- Minimal secondary processes;

HIGH QUALITY PRODUCTS

Well-equipped apparatus and instruments, and strict quality control throughout all stages of production;
Owning R&D team with 20 experienced qualified engineers;
5-10 new items are currently distributed to market every month;
One stop of complete solution for lighting projects;
Unique imagination and designing advanced developing technologies;
Strict quality parameters conformed with standards.

THE LANGUAGE OF LIGHTING

Wattage, CRI, CCT, Lumen, Beam angle and UGR these are the important factors which effect the lighting environment. Different combination of these factors will create quite different lighting quality we are living.

WATTAGE

THE LIGHT'S ENERGY CONSUMPTION

Lower wattage LED use less electricity

CRI

THE ABILITY OF REVEAL COLORS OF OBJECTS

A higher number more true colors to reveal

CCT

A SCALE FOR COLOR OF LIGHT

A higher number means a cooler light.

LUMENS

MEASURE THE LIGHT'S BRIGHTNESS

A higher number means more output of light

BEAM ANGLE

A SCALE FOR ANGLE OF LIGHT

Narrow for spotlight wide for flood lights

UGR

A SCALE OF COMFORTABLE OF LIGHTING

Below 16 is good more than 25 is bad

PRODUCTION PROCESS

Thanks to our perfect PMC system, production system and strict quality control system with perfect inspection process,

All new products undergo stringent validation and age testing prior to production.

All products undergo "burn in" test prior to packing.

All orders are QC inspected by our staff prior to shipping.

All products in mentioned have independent certified to meet customer's need.

Global Excellence Made in KETAI Lighting

We have 500 employees, our greatest advantage is to design, develop and produce the special, creative and high-tech LED lights. No matter what kinds of LED lights you want, just tell us your demand. The best solution would be provided by our professional engineers, our well experienced 20 engineers in the R&D dept. To customize available solutions for various lighting projects and free design drawing can be provided according to customer's demand.

We are ISO 9001 certified manufacturer. Most items of our products are approved by CE, RoHS, SAA etc. certificates.

We are keeping on running with the vision focusing on service, education, brand and technology support. With more than 20 years lighting experience, Ketai lighting is getting a good reputation in commercial lighting industry in the world and has an extensive sales network.

Lighting Solution Made in KETAI Lighting

Thanks for our unique and creative design, our product is introduced in mainly application, from large residential or public buildings to commercial, institutional or public spaces.

Lighting Completeness Made in KETAI Lighting

We are ISO9001 certified manufacturer and most of our products are approved by CE, CB, UL, SAA, GS, TUV and CCC certifications. The quality of our products is assured by our implementing QS ERP system and well-equipped testing lab. With more than 20 years experience in lighting fixtures exporting field, our market has covered Europe South America, Mid-East and Russia.

The R&D Department has 20 engineers and they independently research and develop new products each year.

Our engineers have the comprehensive ability of structure development, optical design, thermal design to meet customers' various demands.

Ketai Lighting is a commercial lighting manufacturer specialized in a diverse range of interior light with exterior light. The product range covers LED recessed downlight, LED track light, LED ceiling light, LED wall light, LED magnetic light system and LED outdoor light.

Value Added Service Made in KETAI Lighting

The greatest advantage of ours is to design, develop and produce the special, creative, high-tech LED lights. No matter what kinds of LED lights you like, just tell us your demand, the best solution would be provided by our professional engineers, 20 well experienced engineers in the R&D dept. And also we customize available tailored solutions for various lighting projects.

Using what we have learned and accumulated experience, we are constantly moving forward and creating new concepts. This proprietary technology allows us to tailor our customers.

Tailor-made is an alternative solution, which means

- 1) customizing the size of the luminaire according to the size of the area used;
- 2) maintaining the color of the luminaire in harmony with the overall color of the area used and the surrounding environment;
- 3) design style of the luminaire to meet the needs of the decoration style of the use of the regional space;
- 4) the performance of the luminaire meeting the needs of specific application scenarios, such as waterproof, moisture-proof and corrosion-resistant.

TWIN SERIES

TWIN series is a carrier of transformation from Halogen bulbs to LED lighting.
The TWIN series was created on 1st.August, 2012 and has been a pioneer of LED lighting fixture in the preliminary stage.

RETROFIT SERIES

Retrofit series was born in 14th Dec, 2012. It immediately became popular after it was launched because of aesthetic style and the texture of materials. The customized reflector with steps is also a classic symbol of Retrofit series. In the past ten years, Retrofit series has been improved for many times with the technology innovation of LED chips, drivers and raw materials, and definitely, the improvements will never stop.

SARDINE SERIES

Sardine series is an extension of Retrofit series with a different arc-shaped front ring, furthermore there are new adjustable version, tiltable and rotatable version, double or triple lighting fixtures and trimless recessed version. They are complementary to Retrofit for different customers' aesthetic requirements.

SARDINE PRO SERIES

CUP SERIES

CUP family has fixed and tiltable downlight and surface mounted ceiling light, mainly for hospitality application.

IBIS SERIES

IBIS is a new concept in the installation method. It is a magnetic structure, so this series is endowed with infinite rotatable direction. To solve the space limitation, the height of the lamps is only 45mm. IBIS series is a big family with recessed, surface mounted, wall mounted version, and single fixture and double fixtures in each version. The two typical designs and diversified structures can provide the supports in enormous applications.

MAGNETIC

IBIS
SERIES

MULTIS SERIES

UGR
<16

Thanks to the new technology of optics and optimization of structure, we can make the MULTIS series with height of only 16mm and the UGR less than 16.
Now MULTIS series is improved to generation 2 by using 5050 LED chips, the lighting is much more uniformity.
MULTIS series has recessed downlight, surface mounted light, 3-phase track and magnetic track light version to meet multiple requirements.

EYE SERIES

EXTREM SERIES

EXTREM series have fixed and tiltable downlights, surface mounted spotlights, track lights and pendent lights, so the diversified installation can be used in different applications and keep the same lighting style.

LESS G1 was created for commercial lighting with UGR<16 in two powers, 20W and 30W. Front ring can be customized with different color, and wall-washer component is ready for option. Honeycomb is available for further anti-glare for high and big room space.

LESS G1 SERIES

LESS G2 SERIES

LESS G2 is expanded based on G1 with more options in product range. Downlight series has from 3W to 30W with size from mini diameter 40mm to max. 115mm, and front ring has been replaced with aluminum material for better texture and anti-glare. Colorful front rings and honeycomb are available for customized requirements. With the diversified options, LESS G2 can provide systematic solution for applications in a wide range where personalized lightings are needed.

CANEO SERIES

UGR

PRO SERIES

Extendable ZOOMER SERIES

Zoomer has distinguished quality of light and design of elegance. The family comprises three product ranges with 2 sizes, free interchangeable distributions from 8° to 45° lens, as well as three mounting methods of 48V magnets, In-track, recessed and surface mount, this enables you to illuminate museums, boutique offices and foyers more efficiently and with more diversity.

Rotatable ZOOMER SERIES

SAIL SERIES

SAIL Wall-washer Series help to provide professional wall washer lighting for our customers from the three key features:

- Distinctive lens colligated with asymmetric and wall-washer function, which can highlight a wider area.
- Housing in material of ADC12 Aluminum extrusion is excellent in heat dissipation, which can ensure a long lifespan of 5 years at least.
- KETA's customized LED sources with lower ultraviolet light than the museum design standard ($75\mu\text{W}/1\text{m}$), so this light can be widely used in high-end applications, for example, galleries and museums of paintings, fabrics, etc.

DIY SERIES

DIY series-LED modules is a modular format that can be used in place of a 50mm halogen MR16 lamp, offering multiple combination of head-sinks and optics, excellent quality of light and substantial energy saving possibilities.

DIY OPTICS

V Series

Reflector is the common version. Using Optosource reflectors available to meet scenes needed basically. And also it works with anti-glare. Lower cost to get spot lighting, better heat dissipation and display with anti-glare.

Multiple Choices of Beam

20°, 30°, 40°, 60°

Gemini Series

The highlights are reflector textured and deep anti-glare. It is excellent performance to apply to track light and downlight without anti-glare structure. Easy for assembly as the reflector diffuser and light guide are integrated by injection. Small hole design in center, and better for heat dissipation.

Multiple Choices of Beam

10°, 15°, 24°, 36°, 50°

Dark Series

To adopt deep glare technology of the luminaires is more popular in the residential and commercial lightings, which offers comfort to all who experience it. With microlite structure in the surface to reduce the back reflection of the lens, there by reducing the background light.

Multiple Choices of Beam

10°, 15°, 24°, 36°, 50°

Glareless Series

The professional design and the PC materials of the optics can be ensured glareless performance and light output. Ideal for lighting environments, the glareless series is your best choice.

Multiple Choices of Beam

10°, 15°, 24°, 36°, 50°

Soft-light Series

It is the first choice for color temperature changing of light source in the project solution. To match with deep anti-glare decorative ring, the light spot will be cut off, excessively uniform and clean. While changing the color temperature, the shape and size of the light spot do not change.

Multiple Choices of Beam

10°, 15°, 24°, 36°, 50°

CLIP SERIES

CLIP series are designed in 2016 for aesthetic requirements in commercial and hospitality applications.

Especially XD2104, there are two holes for applications where the cables are surfaced mounted. It is friendly solution for the nice installation.

ROBOT SERIES

Thanks to the innovation of driver technology, so the size of the ceiling plate can be smaller to be better fitted with the slim lighting fixture which is only 40mm diameter. Diversified color can be customized for the lamps so that lighting is more vivid in our living space.

CAN SERIES

CAN series have four size providing power of 8W to 32W for small to wide lighting space, and optics option offers lens, honey-comb, PC reflector and high efficiency aluminium reflector. Thanks to the latest technology of lighting source, all the four models have been upgraded up to 120lm/W. Furthermore, with the combination of new light source and aluminium reflector, the lumen efficiency can make >130lm/W. A great improvement for energy saving and cost saving.

MORRIS SERIES

The unique appearance is friendly for commercial, retail and hospitality lighting. For different lighting requirements, we have three kinds of optics for option. The lamp series with aluminium reflector can provide a higher lumen output. The A lens series has very clean facula and accurate beam angle. The whole lamp also has good performance in deep anti-glare. The B lens series mix the functions of reflector and lens so that it can make balance between lumen output and anti-glare.

TAPE SERIES

TAPE series are designed with changeable facula. To make them meet more applications, we develop four kinds of optics for the series:

1. Standard beam angle: 15°/24°/34°/48°
2. Flood: 40°/60°
3. Square: 55°
4. Rectangular: 40°/65°

TRACK WALLWASHER G2 SERIES

To create and develop the everlasting low carbon green economy is the essential responsibility that KETAI is always pursuing with its high capability in quality, innovation and credit, service into its business management philosophy to achieve greater development for enterprise and business partners. TRACK wall-washer G2 is made with this spirit. It has been upgraded to smaller size and better quality with higher efficient reflector, LED COB and integrated driver.

PANEL SERIES

Refined functional components are perfectly matched. The light distribution is shaped with 55° super wide beam-angle, it projects light with no distortion, no blue edge, and no color difference for a max. 2m × 2m area.
 The lamp is compatible with intelligent control systems like DALI, WiFi, Bluetooth, Zigbee and other intelligent systems to control the lighting effect with preferable color temperature and brightness by 4 adjustment buttons on the display.

MUSE SERIES

Stepless adjustment of color temperature and brightness;

Switch key for brightness and color temperature

Color temperature adjustment.
 Total 7 color temperatures for selection:
 2700K 3000K 3500K 4000K 5000K 5700K 6500K

Brightness adjustment,
 4 levels in total,
 25% 50% 75% 100%

The major photometric data is readable conveniently through a digital display screen built on the top of the lamp body.
 In practical applications, if the product to be displayed is at similar parameter as of the configured one, user can copy the settings of the first light to other lights, simplify the entire installation and debugging process with great efficiency.

MUSE track light presents a professional geometric lighting with outstanding performance typically for museums, art galleries, cultural and artistic projection, high-end hotels, etc.

Filter Collections

NOIR SERIES

PLOUGH SERIES

SMARITI SERIES

SMRITI G2 are made with aluminium extrusion and unique structure for excellent heat dissipation.

Thanks to the innovation of lighting technology, now we have new versions with high lumen efficiency of more than 135lm/W which is a significant contribution in energy saving.

LEIDY Series

Adaptor convertor

Adaptor convertor is used to connect the lamp body with the fixture adaptor or integrated driver, and the assembly is tool-free. It provides a solution to reduce stock of finished goods.

Zoomable function is welcome by users for more and more applications where people's ideas go. Our leading technology makes the ideas become true. Besides the track light, NORTH POLE series have two new family members of outdoor lighting. The refined components can be perfectly matched so that the lights can precisely manage the wide beam angle from 15° - 50°.

RECESSED DOWNLIGHT

Ceiling luminaires are ideal for general lighting, particularly suitable for large, high-ceilinged rooms.

The combination of the different luminaire models and an ambitious range of lumen packages and light optics, makes it possible to plan functional, comfortable and energy-efficient lighting environments for any situation regardless of ceiling height and other configuration to accentuate prominent areas, such as points of sale, highlighting works of art and some designated areas in commercial buildings, hospitality and residential application.

From wide beam to narrow beam, from fixed mechanical structure to adjustable or retractable design, from 3° narrow beam angle to wide beam of 60°, from single head to gimbal and triple heads or more, with trim and trimless, KETAI downlight family provides a total solutions for all your interior projects with high-efficient reflectors for different light distribution spreads, die-cast aluminium lamp body for optimal cooling and low weight. Types of independent dimmable driver for optimal lifetime and light flow performance, optional versions with DALI, Tunable White and RGBW are available upon your selection.

SURFACE MOUNTED LIGHT

Ceiling luminaires are ideal for general lighting, particularly suitable for large, high-ceilinged rooms.

The combination of the different luminaire models and an ambitious range of lumen packages and light optics, makes it possible to plan functional, comfortable and energy-efficient lighting environments for any situation regardless of ceiling height and other configuration to accentuate prominent areas, such as points of sale, highlighting works of art and some designated areas in commercial buildings, hospitality and residential application.

From wide beam to narrow beam, from fixed mechanical structure to adjustable or retractable design, from 3° narrow beam angle to wide beam of 60°, from single head to gimbal and triple heads or more, with trim and trimless, KETAI downlight family provides a total solutions for all your interior projects with high-efficient reflectors for different light distribution spreads, die-cast aluminium lamp body for optimal cooling and low weight. Types of independent dimmable driver for optimal lifetime and light flow performance, optional versions with DALI, Tunable White, RGBW are available upon your selection.

Integrated Track

Embedded Track

TRACK LIGHT

Enjoying lifetime in an even better acclaimed spaces, through optimized and innovative lighting solutions, use KETAI distinguished track light family to enhance cultural places, galleries, stores and hotels, it can complement your interior style in the most appealing way.

KETAI track luminaires are designed discreet, compact, efficient and powerful, with high quality die-casting housing and excellent color rendering and different color temperature options of COB, great functionality of retractable, zoomable, 90° inclination on the horizontal plane and 355° rotation around the vertical axis, titlable, lens and reflector interchangeable... No matter if you opt for ceiling rails (flush mount or recessed), pendants or wall-mounted, we always have a solution to achieve the overall impression and lighting in the spaces.

One second installation

Anywhere in the track, various products can be placed, such as spotlight, linear light and pendant light.

MAGNETIC LIGHT

With the increasing need of miniaturization of luminaire, low voltage magnetic track light has become the best choice with great flexibility and easy installation especially for those high ceilings, clean energy field, building electrical or big open areas with higher electrical security requirements.

This magnetic track light series is suitable for general basic lighting. It is safe and reliable under low voltage, a set of strong magnets mounted on its backside enable mounting on metal structures or other smooth surfaces by the use of the adhesive metal strip. A version of Stucchi EVO track rail and power supply system is considered to be a great option to minimize the product structure and the connectivity of a longer track rail with more lamps.

A sheath/blank is available flush with the track to cover spaces without spotlights. you can enjoy the right atmosphere in every part of the premises with great light comfort.
