This is a very special luminaire. The lighting part is surrounded and "protected" by a "handle". With the light shining downwards, it could be used in different ambience. Unique design, fashionable and reliable quality is the label of it. It really is a combination of "appearance and strength".

The design of the luminaires may get upgraded and the specifications of them may be adjusted by different degree. Please visit our website and check the detail description and specification of the luminaires. For the products that you are interested in, you could find there all the needed information: power, luminous flux, CCT, CRI, etc.

Power supply box

FL971A

IP Rate: IP65

Input: 220-240V 50/60Hz

Output: 48V/220-240V 240W

Features: AC/DC can be output synchronously. The 48V safety voltage is applied in the outdoor lighting system, with the application of waterproof terminals, the power consumption of outdoor lighting is in a safe range. Meanwhile, the product has a standard European socket to meet the user's temporary power demand.

FL971B

IP Rate: IP65

Input: 220-240V 50/60Hz

Output: 48V 240W

Features: In the outdoor lighting system, using 48V safety voltage and waterproof terminals can meet the fast and safe application installation, and at the same time make the power consumption of outdoor lighting within the safe range.

FL971C

IP Rate: IP65

Input: 220-240V 50/60Hz

Output: 220-240V 1200W

Features: In the outdoor lighting system, using 48V safety voltage and waterproof terminals can meet the fast and safe application installation.

FL971D

IP Rate: IP65

Input: 220-240V 50/60Hz

Output: 220-240V 1200W

Features: This item with a standard European socket to meet the user's temporary power demand.

Adopted specially shielded optical design, this ensures light is directed exactly where it's needed – onto the ground and immediate surroundings – creating a safe, clearly defined pool of illumination without intrusive spill. The result is pure, functional light that respects the night sky and your home's tranquility. This discreet guardian casts its carefully contained beam downward and outward, illuminating pathways, borders, and garden features with precision while eliminating harsh glare and upward light loss.
